CampusTop

TEACHER ORIENTATION

Attendance rules, made clear

PFI Deduction · Attendance Incentive · Monthly Ranking

A practical refresher for teachers

November 2026

START HERE

One attendance record can create three different outcomes

The evidence may be shared, but each portal answers a different question.

01

PFI Deduction

What amount is deducted?

Daily attendance findings are converted into an LVL code and a peso deduction.

02

Attendance Incentive

Do I qualify for ATI?

Any qualifying issue can make the month not qualified and reset the next amount.

03

Monthly Ranking

What is my score and rank?

The score starts at 30.00, then defined attendance deductions are subtracted.

Remember **A result can be correct in one portal and different in another because the purpose, cutoff, immunity, and rate are not the same.**

PURPOSE

What this orientation is about

A practical refresher on how attendance records affect deductions, incentive qualification, and monthly ranking.

WHY THIS MATTERS

The same schedule, clock-in, attendance INFO, and leave record can affect each portal differently.

Understanding the calculation helps you check results early and file corrections before the deadline.

During this session

1. **Understand the cutoff**
   Know which attendance dates belong to the displayed month.
2. **Follow the evidence**
   Check the active schedule, valid clock-in, attendance INFO, and approved leave.
3. **Correct an inaccurate result**
   Use the employee portal before the filing window closes.

BY THE END — **You should know where a result came from and what to verify before filing a correction.**

CampusTop

NEXT PORTAL

01

PFI Deduction

How verified attendance issues become payroll deductions

What we will discuss

The cutoff and evidence behind each deduction, followed by immunity rules and correction filing.

CampusTop

PURPOSE AND CUTOFF

PFI turns a verified daily attendance issue into a deduction

Active Cebu teachers in BFC and ITP are included.

CUTOFF

26 → 25

Example: Sep 26 to Oct 25

EFFECTIVE

Sep 2026

Earlier review months are not calculated

DAILY RULE

1 result

Only the highest applicable LVL per workday

Four checks before a deduction

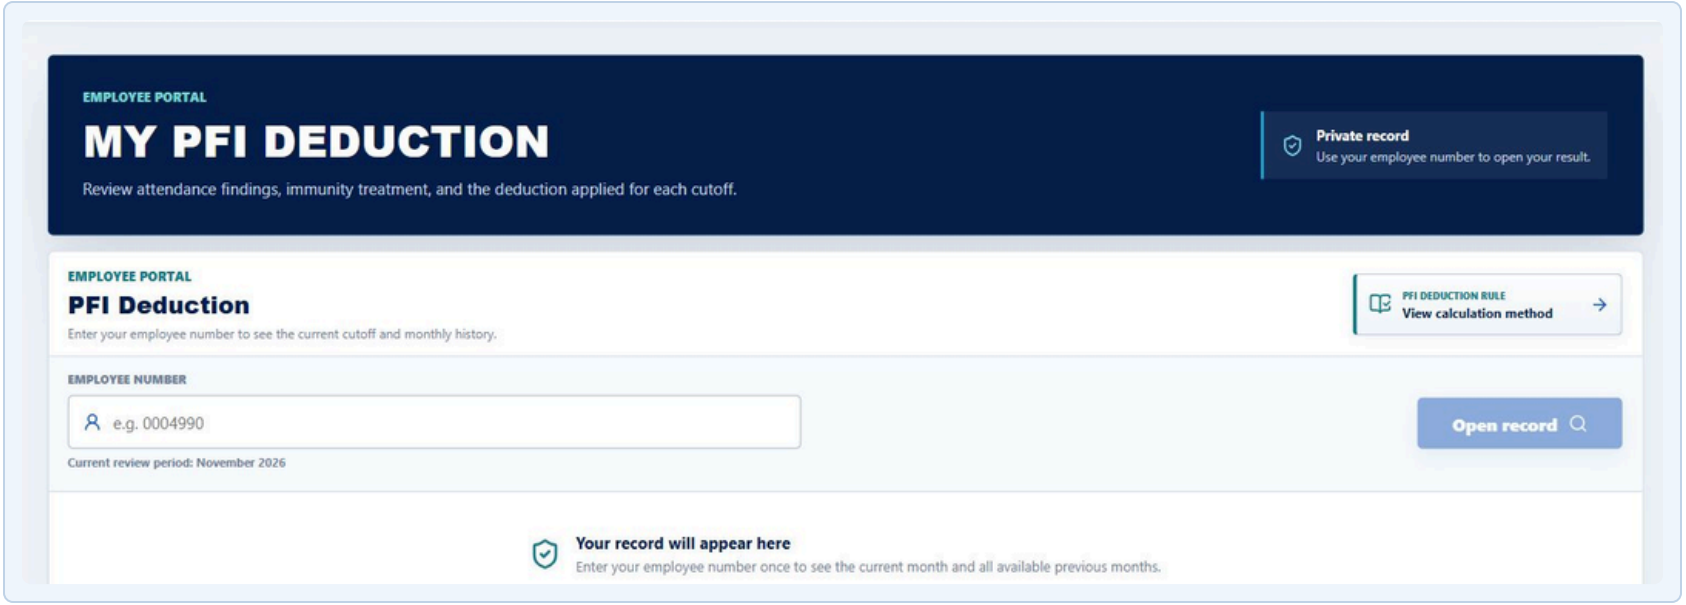

1 Active shift **2 Clock-in and work completed** **3 Attendance INFO** **4 Immunities and rate**

Gross PFI safeguard Applied deduction stays ₱0 until Gross PFI is available.

EMPLOYEE PORTAL

Opening a PFI record

Enter the employee number, then select Open record. The Calculation Method button opens the full rule page.

DAILY ATTENDANCE LOGIC

The shift is identified before the clock-in is judged

The portal uses Japan Time and validates the schedule history for that exact date.

1

Regular start

09:00 JT

Active dated schedule first; base schedule second.

2

Required clock-in

08:50 JT

Ten minutes before the first active shift block.

3

Late begins

08:51:00 JT

A 60-second grace applies after the required time.

4

Work deficit

> 30 minutes

Up to 4 hours = undertime; over 4 hours = absence.

CampusTop

ATTENDANCE ISSUE: LATE

Late starts when the first valid clock-in misses the required time

The required clock-in is 10 minutes before the first active regular shift block. Japan Time is used.

09:00	08:50	08:50:59	08:51:00
regular shift	required clock-in	latest on-time clock-in	late begins

Valid Time In	The portal uses the first valid Time In clock-in. Invalid and deleted records do not count.
Minutes late	The system measures minutes from the required clock-in time, not from the class start.
Late INFO	A matching attendance notification changes the code. The clock-in remains the main attendance evidence.
Schedule first	The portal confirms the active dated schedule before it judges whether the clock-in was late.

ATTENDANCE ISSUE: ABSENCE

Absence applies when more than four hours of required work are missing

Code	What happened	Information found	Meaning
A1	Approved absence with certificate (AWC)	Certificate or AWC confirmation	Absence with certificate
A2	Absent	Valid Attendance INFO, no certificate	Absence with INFO
A3	Absent	No valid absence INFO	Absence without INFO

Important **AWC is an A1 absence code. It is different from approved-leave immunity. An approved leave must separately match the teacher, status, and attendance date.**

ATTENDANCE ISSUE: UNDERTIME

Undertime means 31 minutes to 4 hours are missing

The code identifies whether time was missed before the shift, after the shift, or together with late arrival.

Code	What happened	Information found	Simple meaning
U1	The teacher ended the shift early	Valid Post-undertime INFO	Time missing after work
U2	The teacher missed the start of the shift	Valid Pre-undertime INFO	Time missing before work
U3	Late arrival and undertime happened on the same workday	Valid attendance INFO	Late plus undertime
U4	The system found undertime	No valid undertime INFO	Undertime without INFO

A deficit of 30 minutes or less is ignored as it is under late. More than four hours becomes absence.

CampusTop

LATE CODES AND AMOUNTS

Minutes late and valid Late INFO determine the deduction

Fixed late amounts do not change with the teacher's Gross PFI class. NIL2 uses the class rate.

Code	Minutes late	Late information	Deduction
L1	1 to 5 minutes	Valid Late INFO	₱200
L2	More than 5 to 10 minutes	Valid Late INFO	₱200
L3	More than 10 minutes	Valid Late INFO	₱250
NIL1	Within 30 minutes	No valid Late INFO	₱350
NIL2	More than 30 minutes	No valid Late INFO	Gross PFI class rate

Late INFO changes the code. It does not remove the clock-in evidence.

ABSENCE AND UNDERTIME AMOUNTS

Non-late codes use one of three Gross PFI class rate groups

Find the code group first, then use the teacher's current Gross PFI class to find the peso amount.

Gross PFI class	Group 1: A1 / U1 / U2	Group 2: A2 / U3	Group 3: A3 / U4
Class 1: below ₱4,000	₱300	₱400	₱750
Class 2: ₱4,000 to ₱7,999.99	₱600	₱800	₱1,500
Class 3: ₱8,000 to ₱12,999.99	₱1,200	₱1,600	₱3,000
Class 4: ₱13,000 and above	₱1,950	₱2,600	₱4,875

CampusTop

WORKED EXAMPLES

The code is selected first, then the correct deduction is applied

Immunity can still reduce a calculated amount after the code is identified.

L1

3 minutes late + valid Late INFO

Fixed deduction: ₱200

PFI class does not change L1.

NIL2

35 minutes late + no Late INFO

Class 2 deduction: ₱1,500

NIL2 uses the Gross PFI class.

A1

AWC + Class 3 Gross PFI

Class 3 deduction: ₱1,200

AWC is classified as A1.

U3

Late plus undertime + valid INFO

Class 4 deduction: ₱2,600

U3 uses the A2 / U3 rate column.

IMMUNITY AND LEAVE

An attendance finding may be removed before the deduction is applied

The order matters: approved leave first, ATI immunity second, late-only immunity last.

1

Approved full-day leave

Covered dates are removed when the leave is approved and the date range matches.

2

ATI immunity

The earliest remaining LVL incident receives no PFI deduction.

3

Late-only immunity

Only L1: first 4. Only L2: first 3. Only L3: first 2. Mixed LVL codes: none.

Leave immunity checklist

1. Status is APPROVED
2. The approved start and end dates cover the attendance date
3. The leave covers the full day
4. The leave type is included in the approved list

AWC is not a leave exemption. The portal classifies AWC as A1.

APPROVED LEAVE IMMUNITY

These full-day leave types can remove the covered PFI finding

The leave must be APPROVED and its approved date range must cover the attendance date.

- Service Incentive Leave
- Attendance Incentive Leave
- Home Leave
- Planned Absence (PA)
- Sick Leave
- Bereavement Leave (BL)
- Emergency Leave
- Indefinite Leave
- Solo Parent Leave (SOL)
- Magna Carta for Women
- Maternity Leave
- Paternity Leave
- VAWC

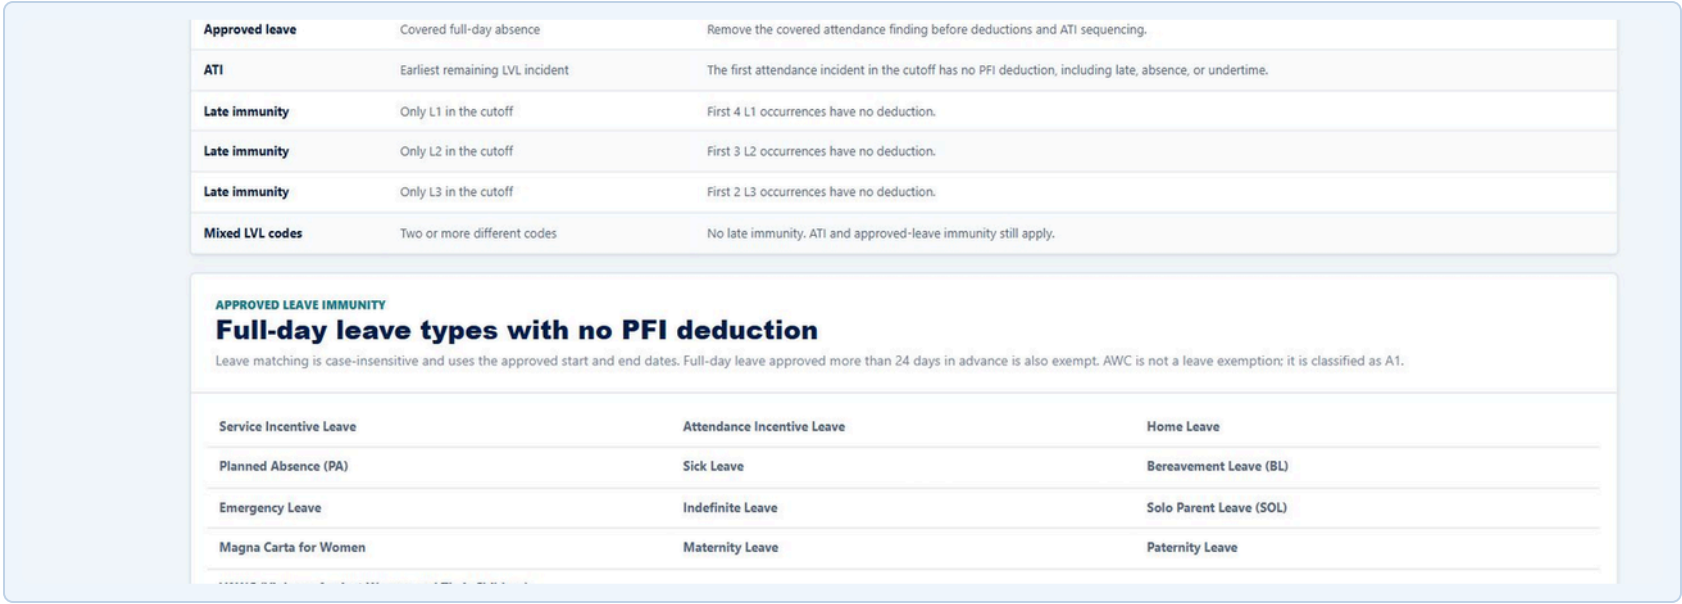

Advance filing — **A full-day leave approved more than 24 days in advance can also be exempt.**

AWC is not leave immunity
AWC is classified as A1.

CALCULATION METHOD

Where the approved leave and immunity rules appear

Open View calculation method in the employee portal. The image below shows the live immunity section.

Approved leave	Covered full-day absence	Remove the covered attendance finding before deductions and ATI sequencing.
ATI	Earliest remaining LVL incident	The first attendance incident in the cutoff has no PFI deduction, including late, absence, or undertime.
Late immunity	Only L1 in the cutoff	First 4 L1 occurrences have no deduction.
Late immunity	Only L2 in the cutoff	First 3 L2 occurrences have no deduction.
Late immunity	Only L3 in the cutoff	First 2 L3 occurrences have no deduction.
Mixed LVL codes	Two or more different codes	No late immunity. ATI and approved-leave immunity still apply.

APPROVED LEAVE IMMUNITY

Full-day leave types with no PFI deduction

Leave matching is case-insensitive and uses the approved start and end dates. Full-day leave approved more than 24 days in advance is also exempt. AWC is not a leave exemption; it is classified as A1.

Service Incentive Leave	**Attendance Incentive Leave**	**Home Leave**
Planned Absence (PA)	**Sick Leave**	**Bereavement Leave (BL)**
Emergency Leave	**Indefinite Leave**	**Solo Parent Leave (SOL)**
Magna Carta for Women	**Maternity Leave**	**Paternity Leave**

IF A PFI RECORD LOOKS WRONG

File the correction before the applicable deadline

All deadlines are 11:59 PM Philippine time. The event date is day zero.

Sep 26 – Oct 25	**Nov 8** 2026 deadline
Oct 26 – Nov 5	**Nov 10** 2026 deadline
Nov 6 onward	**+5 days** Capped at November 30

After filing

File correction is hidden, but the request remains visible in the correction summary.

Correction result

The request goes to the Correction Admin Portal. The PIC checks the schedule, clock-in, approved leave, and supporting attendance records. An approved correction recalculates the affected result.

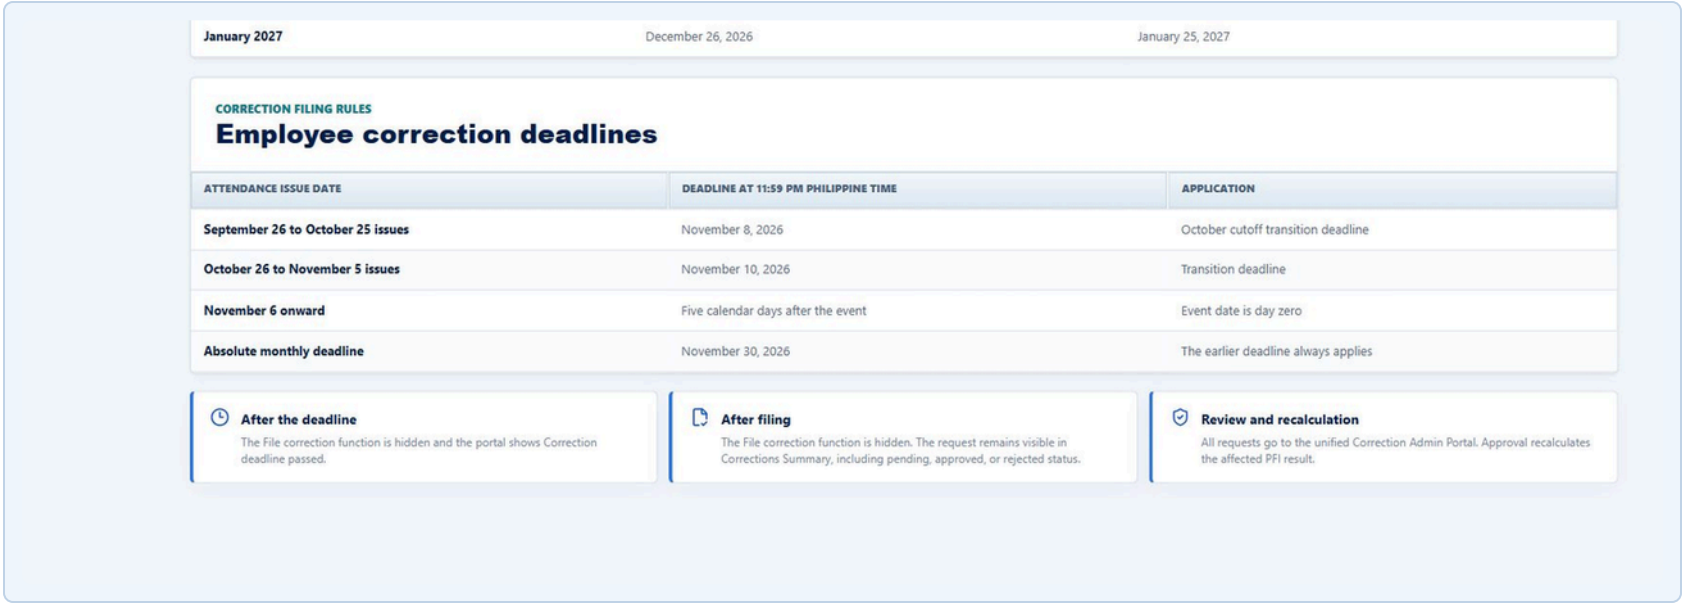

Teachers can still see the filed request and its status after the filing button disappears.

CampusTop

CORRECTION FILING

Where the PFI correction deadlines appear

The portal hides File correction after the applicable deadline or after a request has already been filed.

January 2027	December 26, 2026	January 25, 2027

CORRECTION FILING RULES

Employee correction deadlines

ATTENDANCE ISSUE DATE	DEADLINE AT 11:59 PM PHILIPPINE TIME	APPLICATION
September 26 to October 25 issues	November 8, 2026	October cutoff transition deadline
October 26 to November 5 issues	November 10, 2026	Transition deadline
November 6 onward	Five calendar days after the event	Event date is day zero
Absolute monthly deadline	November 30, 2026	The earlier deadline always applies

After the deadline
The File correction function is hidden and the portal shows Correction deadline passed.

After filing
The File correction function is hidden. The request remains visible in Corrections Summary, including pending, approved, or rejected status.

Review and recalculation
All requests go to the unified Correction Admin Portal. Approval recalculates the affected PFI result.

CampusTop

NEXT PORTAL

02

Attendance Incentive

How monthly qualification affects ATI payout progression

What we will discuss

Qualification and amount progression, followed by approved leave treatment and correction deadlines.

ATI TYPES

Monthly, Bi-Annual, and Annual ATI are separate rewards

Each reward uses its own period. Bi-Annual and Annual ATI are not totals of monthly ATI amounts.

01

Monthly ATI

₱1,000 to ₱2,500

Each official payroll cutoff

The amount moves through a six-month cycle.

02

Bi-Annual ATI

₱2,000

Period 1: Dec 25 to Jun 22
Period 2: Jun 23 to Dec 18

The whole six-month period must qualify.

03

Annual ATI

₱3,000

Dec 25 of the prior year to Dec 18

Credited on February 14 of the next year.

Monthly ATI uses the official 2026 payroll calendar. The cutoff dates change by month unless changed by the company.

CampusTop

MONTHLY ATI

A qualified month moves one step up. A failed month resets the cycle.

January and July start new six-month payout cycles.

₱1,000 → ₱1,300 → ₱1,600 → ₱1,900 → ₱2,200 → ₱2,500

QUALIFIED

Move to the next amount

Maximum monthly ATI: ₱2,500

NOT QUALIFIED OR DATA INCOMPLETE

Current month = ₱0

Next qualified month restarts at ₱1,000

Separate rewards: Biannual ATI = ₱2,000 · Annual ATI = ₱3,000 · They are not sums of monthly ATI.

CLOCK-IN RULE

The regular weekly shift sets the required clock-in time

09:00:00
shift start

10 minutes early

08:50:59
latest on-time clock-in

08:51:00 and later is late

APPROVED LEAVE

Leave can remove an attendance issue and still affect ATI qualification

The portal performs two separate checks: attendance shielding and leave qualification.

STEP 1 ATTENDANCE SHIELDING

The leave must be APPROVED and filed more than 24 days before the corrected start date.

It can then remove covered absence, late, undertime, and clock-in late findings.

STEP 2 LEAVE QUALIFICATION

Some approved leave types still make the period NOT QUALIFIED.

Planned Absence, Bereavement, Emergency, Sick, Maternity, and Indefinite Leave are on this list.

MAY REMAIN ELIGIBLE

Solo Parent Leave, Paternity Leave, and SPL

They must still meet the more-than-24-days filing rule.

DATE FIELDS USED

Correct Start Date and Correct End Date

Pending, processing, rejected, and canceled leave does not shield attendance.

CampusTop

ATI EXAMPLES

The next amount depends on the result of every month in the cycle

Use the result first, then apply the progression rule.

Normal progression

Aug ₱1,300 Sep ₱1,600 Oct ₱1,900

Each month qualified, so the amount moved up one step.

Reset after an issue

Aug ₱1,300 Sep ₱0 Oct ₱1,000

September was not qualified. October restarted at ₱1,000.

Approved Sick Leave

Attendance issue removed, but ATI may still be ₱0

Sick Leave can still disqualify under the separate leave rule.

Data incomplete

Current month ₱0 Next qualified month ₱1,000

The portal does not assume perfect attendance when a source is incomplete.

CampusTop

ATI CORRECTIONS

Only November attendance issues are open for employee correction filing

All deadlines close at 11:59 PM Philippine time. The attendance date is day zero.

Nov 1 to Nov 5	**Nov 10** Fixed transition deadline
Nov 6 onward	**+5 days** Five calendar days after the event
Monthly cap	**Nov 21** Use the earlier deadline

After filing **The button is hidden. The request remains visible in Corrections Summary. Approval recalculates ATI.**

CampusTop

NEXT PORTAL

03

Monthly Ranking Attendance

How attendance deductions affect the monthly score and rank

What we will discuss

Score calculation and deduction references, followed by approved leave treatment and corrections.

CampusTop

SCORE AND RANK

Monthly Ranking starts at 30.00 and subtracts attendance deductions

The cutoff is the previous month’s 26th through the ranking month’s 25th.

30.00 — **total deductions** = **final score**

Minimum: 0.00

EXAMPLE

Absence with INFO 2.50
Late with INFO 1.00

30.00 − 3.50 = 26.50

RANKING

Higher final score = higher rank

Teachers with the same final score share the same rank.

CampusTop

ATTENDANCE TYPES

The attendance label tells the system which point deduction to use

Records must fall inside the cutoff and match an active teacher in the correct Cebu or Outsource group.

Absence Without INFO

The attendance source shows absence and no matching attendance INFO exists.

Absence With INFO

The attendance source shows absence and a matching attendance INFO record exists.

Pre-Undertime

The teacher missed part of the beginning of the scheduled work period.

Post-Undertime

The teacher left before completing the scheduled work period.

Late With or Without INFO

Cebu late records use the Reason Category to determine whether valid INFO exists.

Outsource special types

Sick leave with or without a medical certificate and Class Substitution have separate rules.

Data safety **Possible duplicates are skipped. Unknown attendance types are flagged and receive no deduction until reviewed.**

DEDUCTION REFERENCE

Cebu and Outsource use related, but not identical, deduction lists

CEBU TEACHERS

Attendance result	Points
Absence Without INFO	3.00
Absence With INFO	2.50
Service Incentive Leave / SIL Converted	1.50
Undertime Pre	2.00
Undertime Post	1.50
Late Without INFO	1.00
Late With INFO	1.00

SIL Converted to Sick Leave remains a 1.50 deduction.

APPROVED LEAVE

A matching approved leave can reduce the deduction

The leave must match the teacher, show Approved status, and cover the same attendance date.

USUALLY 0 POINTS

Approved leave immunity

When the qualifying approved leave covers the same attendance date.

EXCEPTION

SIL Converted = 1.50

AWC keeps the normal attendance deduction unless another qualifying leave overlaps.

LOWEST VALID DEDUCTION

Overlap rules do not stack

When multiple rules apply, the lowest valid deduction is used.

APPROVED LEAVE TYPES THAT CAN REDUCE THE DEDUCTION TO 0.00

Attendance Incentive Leave **Home Leave** **Planned Absence** **Sick Leave** **Bereavement Leave** **Emergency Leave**

Indefinite Leave **Solo Parent Leave** **Magna Carta for Women** **Maternity Leave** **Paternity Leave** **VAWC**

Teacher matching checks QQ name, QQE name, and requester name. If several approved leaves overlap, the lowest valid deduction is used.

CampusTop

RANKING CORRECTIONS

Only November attendance issues are open for employee correction filing

All deadlines close at 11:59 PM Philippine time. The attendance date is day zero.

Nov 1 to Nov 5

Nov 10

Fixed transition deadline

Nov 6 onward

+5 days

Five calendar days after the event

Monthly cap

Nov 30

Use the earlier deadline

After filing **The button is hidden. The request stays visible. Approval recalculates the ranking result.**

BEFORE YOU FILE A CORRECTION

Use this five-step check

Most questions can be resolved by checking the same evidence the portal uses.

1. **Open Calculation Method**
   Confirm the portal’ s cutoff, purpose, and rule.
2. **Check the exact date**
   Make sure the issue belongs to the displayed cutoff.
3. **Compare the source records**
   Schedule history, valid clock-in, attendance INFO, and approved leave.
4. **File before the deadline**
   Use the employee portal’ s File correction function.
5. **Track the request**
   The button hides after filing, but the correction summary remains visible.

BRING THESE DETAILS

- Teacher name
- Employee number
- Attendance date
- What looks incorrect
- Supporting record

Correct records begin with checking early — before the filing window closes.
